

Financial Transaction Software

This software enables financial institutions to manage automated teller machines (ATMs). It allows customers to perform financial transactions, such as cash withdrawals and deposits.

Product Overview

Automated Financial Transaction Solution

This advanced financial transaction software powers automated teller machines to facilitate secure, self-service banking operations. It enables users to perform essential financial activities such as cash withdrawals, deposits, and fund transfers without requiring human assistance. Designed for reliability and user accessibility, the system integrates seamlessly with secure hardware enclosures to ensure protected and efficient transactions.

Core Functionalities

Supported Transactions

- Cash withdrawals
- Cash deposits
- Balance inquiries
- Fund transfers

Hardware Integration

Supported Hardware Interfaces

Card Reader, Keypad, Display Screen, Cash Dispenser

UI Design Standards

Optimized for high-visibility and accessibility in public-facing environments.

Security and Compliance

Security Features

Secure PIN Entry • Tamper-Resistant Enclosure • Encrypted Data Access
