

Fine Cut Hand Saw for Wood and Plastic

This hand saw is designed for precise cutting in decoration and building. It features a narrow blade and ergonomic handle for accuracy and control when cutting wood, plastic, and drywall.

Product Overview

Precision Cutting Tool

This specialized hand saw is engineered for high-precision cutting in decoration and building applications. Featuring a long, narrow blade constructed from high-carbon steel, it delivers accurate results for intricate detail work. The ergonomic, high-visibility handle ensures a secure and comfortable grip, making it an essential tool for trim carpentry and various detail-oriented tasks.

Technical Specifications

Model Number	DT1503
Blade Material	High-carbon steel
Handle Material	Molded plastic

Usage & Applications

Primary Applications

- Decoration
- Building applications
- Trim carpentry
- Detail work

Compatible Materials	Wood, Plastic, Drywall
