Product Overview

The WM-5000ZG system offers robust GPS/Beidou localization, real-time data uploads, and advanced biometric verification.

Advanced Real-Time Guard Monitoring

This advanced guard tour system provides a comprehensive solution for monitoring security personnel, maintenance teams, and surveillance staff. By utilizing real-time data transmission and biometric verification, it ensures that patrol routes and schedules are strictly followed. The device is engineered for durability in harsh environments, making it an essential tool for ensuring accountability and operational efficiency across various facilities.

Technical Specifications

IP Rating

IP67

Localization

GPS, Beidou, Dual-mode

Connectivity

4G, Magnetic USB

Battery Capacity

3400 mAh

Data Transfer Rate

12000 pieces/min

Key Features

Fingerprint Modes

- Close
- Once Verify
- Multiple Verify

Safety & User Features

- SOS Alarm
- Impact Detection
- Man-down Alarm
- Pedometer
- Alarm Clock Reminders

Voice Functions

- Custom Voice Task Prompts
- Operating Voice Prompts
- 4G HD Voice Call

Package Contents

Included Items

- Device
- Magnetic Cable
- Charger
- Software
- Manual
