

Firewood Log Cart with 120kg Capacity

This log cart is ideal for moving piles of firewood. Its steel frame features a powder coating that protects against rust, wind, and rain, while its cross-brace structure provides enhanced load-bearing capacity.

Overview

Robust Firewood Transportation Solution

This firewood log cart is an ideal helper designed for efficient material handling in farming and gardening environments. Featuring a heavy-duty tubular steel frame and high-elasticity air wheels, it provides stable performance across various terrains. With a 120kg capacity, this cart streamlines the process of moving substantial loads of wood with minimal physical effort.

Key Metrics

Capacity and Load

120 kg

Loading Capacity

Physical Dimensions

Dimensions

| Component | Value |
|------------------|---------------------|
| Body Size | 1050 x 535 x 680 mm |
| Handle Thickness | 1.2 mm |
