

# Five-Burner Built-In Gas Hob

This gas hob features five burners, including a triple flame wok burner, two rapid burners, a semi-rapid burner, and an auxiliary burner. It is designed for built-in installation in kitchen countertops.

## Overview

### Professional Five-Burner Gas Hob

This built-in gas hob features a versatile five-burner configuration designed to meet diverse cooking requirements. With a high-output central triple-ring wok burner, it provides the intense heat necessary for stir-frying and rapid boiling. The unit includes a mix of rapid, semi-rapid, and auxiliary burners, offering precise control for everything from searing to gentle simmering.
