

Five-Thread Overlock Machine for Extra-Heavy Fabrics

This overlock machine is designed for sewing thick to extra-heavy fabrics, including denim and heavy knits. It provides a durable and reliable solution for demanding industrial overlocking applications.

Product Overview

Industrial Overlocking Solution

This high-performance five-thread overlock machine is specifically engineered for handling extra-heavy fabrics in demanding industrial environments. It provides a durable and reliable solution for complex overlocking applications, ensuring consistent stitch quality and precision. Designed for efficiency, this machine helps maintain high productivity levels when working with thick and challenging materials.

Key Features

Machine Type

Five-Thread • Overlock

Fabric Suitability

Extra-Heavy

Performance

Operating Speed

6000 RPM

Max Speed

Technical Details

Model Series

M3300-5

Configuration

FF6-60H
