

Five-Thread Overlock Sewing Machine for Medium to Thick Fabrics

This five-thread overlock sewing machine is designed for sewing medium to thick fabrics. It is engineered for efficient and precise overlocking.

Product Overview

High-Efficiency Overlocking Solution

This super high-speed five-thread overlock sewing machine is engineered for high-volume production environments requiring consistent stitch quality. Designed specifically for medium to thick fabrics, the machine features a robust construction that ensures smooth operation and minimal downtime. With adjustable settings for stitch length and differential feed, it provides the versatility needed for diverse industrial sewing applications.

Technical Specifications

Machine Type	Five-Thread Overlock Sewing Machine
Fabric Compatibility	Medium Fabrics, Thick Fabrics

Performance Metrics

Performance Highlights

5 threads
Thread Count

Features

Adjustable Settings

- Stitch Length
- Differential Feed

Operational Benefits

Super High-Speed • High-Volume Production • Consistent Stitch Quality • Robust Construction • Minimal Downtime
