

Five-Thread Overlock Sewing Machine for Thick Fabric

This overlock sewing machine is designed for creating wide edges on medium to thick fabrics. It is ideal for industrial sewing applications requiring high-speed operation.

Overview

High-Performance Industrial Overlocking

This super high-speed five-thread overlock sewing machine is engineered specifically for handling thick fabrics. It provides the precision and efficiency required for demanding industrial applications, ensuring durable and professional seam quality. Built for robust performance, it is an ideal solution for operations that require high-speed throughput on heavy-duty materials.

Technical Specifications

Machine Type	Five-Thread Overlock Sewing Machine
Fabric Suitability	Thick Fabric, Heavy Materials

Performance

Operation Speed
Super High-Speed

Operational Highlights

- Five-thread configuration
- Designed for heavy-duty industrial use
- High-speed operation for increased productivity
- Professional seam durability
