

Five-Zone Electric Induction Cooktop

This electric induction cooktop features five distinct cooking zones for versatile meal preparation. Its sleek black glass surface incorporates a touch control panel and a slider for precise temperature adjustments.

Product Overview

High-Efficiency Induction Cooking

This five-zone electric induction cooktop is designed for modern kitchens, offering rapid heating capabilities that significantly reduce cooking time. The system features multi-level power adjustments to accommodate various culinary needs, while prioritizing safety with advanced sensors and indicators. By eliminating open flames, it provides a cleaner, healthier, and more energy-efficient cooking environment.
