

# Fixed Linkage Harrow

This harrow is designed for efficient soil preparation and cultivation. It features a fixed linkage system for effective tilling, breaking up soil clumps, and leveling the ground.

## Product Overview

### Robust Soil Preparation

The FHP20 Harrow is a durable agricultural implement engineered for efficient soil cultivation and seedbed preparation. Featuring a fixed linkage system, it excels at breaking up soil clumps and leveling ground to promote optimal soil aeration. Its robust construction ensures reliable performance in demanding field conditions, making it an essential tool for modern farming practices.

<b>Primary Function</b>	Soil preparation, cultivation, and tilling
-------------------------	--

## Technical Features

### Linkage System

Fixed Linkage

### Key Benefits

- Efficient soil clump breakage
- Improved ground leveling
- Promotes optimal soil aeration
- Durable construction for longevity

## Application

<b>Usage</b>	Tidying up mown grass and general agricultural soil preparation
