

Fixed Rail Rotary Lift Table

This fixed rail rotary lift table is designed for use in pipelining plants and recycling transfer applications. It features a rotary platform for 360-degree rotation and a scissor lift mechanism for vertical movement.

Product Overview

Industrial Rotary Lift Solution

The Fixed Rail Rotary Lift Table is a specialized industrial platform engineered for seamless vertical elevation and 360-degree load rotation. Designed for heavy-duty applications, this system enhances efficiency in pipelining, recycling, and material transfer environments. Its robust construction ensures stability and precise control, making it an ideal choice for manufacturing, warehousing, and logistics assembly tasks.

Key Features

Core Capabilities

- Vertical scissor lift mechanism
- 360-degree rotary table platform
- Fixed rail-mounted stability
- Heavy-duty industrial construction

Typical Applications

Pipelining, Recycling Transfer, Manufacturing, Warehousing, Logistics

Technical Specifications

Material	High-strength steel
Customization	Yes
