

Fixed Wireless Data Terminal

This fixed wireless terminal provides reliable data connectivity. It features indicator lights for monitoring power, data stream, and online status.

Product Overview

Professional Fixed Wireless Data Terminal

The 2505 Fixed Wireless Data Terminal is a robust connectivity solution designed for high-performance data operations. Featuring a compact and ventilated chassis, this device ensures reliable heat dissipation during continuous operation. With a clear front-panel LED interface, users can easily monitor power, data stream status, upstream activity, and overall link stability in real-time.

Technical Interface

Front Panel Indicators

- Power Status
- Data Stream (DS) 1, 2, 3
- Upstream (US) Activity
- Online Status
- Link Connectivity
