Product Overview

Versatile Vegetation Management

The VD model flail mower is a robust agricultural implement engineered for efficient vegetation management in vineyards, orchards, and pastures. Its standout feature is the reversible three-point hitch, allowing for both front and rear tractor mounting, which enables the simultaneous use of secondary equipment. Built with a heavy-duty rotor and high-strength steel, this mower reliably handles grass, twigs, and cornstalks while providing a clean, uniform cut across diverse terrains.

Key Features

Operational Capabilities

- Reversible three-point hitch for front or rear mounting
- Hydraulically adjustable offset for mowing near obstacles
- Heavy-duty rotor with multiple flails
- Adjustable cutting height for versatile terrain use
- Rear roller for consistent ground contouring

Safety & Durability

High-strength steel construction, Protective guards, Slip clutch driveline protection, Adjustable skids

Applications

Suitable Applications

Vineyards • Orchards • Pasture maintenance • Roadside verges • Cornstalk shredding
