

# Flame Retardant Heat Shrink Tubing

This flame-retardant heat shrink tubing is flexible and ideal for electrical insulation and protection applications. Featuring a 4:1 shrink ratio, it offers reliable insulation, strain relief, and protection against abrasion, chemicals, and moisture.

## Product Overview

### Professional Insulation Solution

RSFR-(4X)GF is a high-performance, flexible, and flame-retardant heat shrink tubing engineered for rigorous electrical insulation and protection requirements. Featuring a high 4:1 shrink ratio, this polyolefin tubing conforms seamlessly to complex shapes, providing superior strain relief and shielding against abrasion, moisture, and chemical exposure. It is an ideal solution for cable harnessing, wire bundling, and component protection in demanding industrial environments.

## Technical Specifications

### Shrink Ratio

**4 : 1**

Shrink Ratio

<b>Material</b>	Polyolefin
<b>Flame Retardant</b>	Yes

## Key Features

<b>Performance Attributes</b>	Flexible, Flame-retardant, Electrical Insulation, Abrasion Resistant, Chemical Resistant, Moisture Protection
-------------------------------	---

## Application

### Primary Applications

- Cable harnessing
- Wire bundling
- Component covering
- Strain relief
