

Flame Retardant Heat Shrink Tubing

This low voltage heat shrink tubing is flame retardant and environmentally friendly. It is suitable for wire connection, insulation, and protection in various applications.

Product Overview

Professional Grade Heat Shrink Tubing

This low-voltage heat shrinkable tubing is engineered for superior wire connection, insulation, and protection. Designed with flame-retardant properties and environmentally friendly materials, it ensures safety and reliability in demanding electrical applications. The tubing is available in a wide range of diameters from 1.0mm to 150.0mm, making it a versatile solution for diverse industrial needs.

Technical Specifications

Voltage Rating

660 V

Voltage

Temperature Rating

125 °C

Max Temp

Flame Retardancy Standard

VW-1

Shrink Ratio

50 %

Physical Properties

Available Diameter Range

1.0mm - 150.0mm

Color Options

Black, White, Red, Yellow, Green, Yellow/Green
