Product Overview

Flame Retardant PVC Electrical Tape

This high-performance PVC electrical tape log roll is engineered for superior electrical insulation and fire safety. It features a soft, flexible design with excellent mechanical strength and reliable adhesion properties, making it an ideal choice for binding and marking wires in demanding environments. Designed for professional use, this tape meets stringent flame retardancy standards and maintains performance across a wide temperature range.

Physical Properties

Dimensions

- Width: 1250mm
- Inner Core Diameter: 32mm, 38mm
- Lengths: 5m, 10m, 15m, 20m, 33m

Available Colors

Black, White, Blue, Green, Red, Yellow

Technical Specifications

Performance Highlights

40 kV/mm

Electrical Strength

80 °C

Max Temperature

Material Grade Comparison (2130Z model)

Property	Value
Thickness	0.13 mm
Tensile Strength	20 N/cm
Elongation	150 %
Flame Test	Pass (UL510)

Operational Guidelines

Safety Compliance

Flame Retardant • UL510 Compliant

Best Operating Temperature

10 °C
