

Flanged Ball Valve with Lever Handle

This flanged ball valve is equipped with a green lever handle. The valve body has flanges on both ends, ensuring secure connections in piping systems.

Product Overview

Industrial Flanged Ball Valve

This flanged ball valve is engineered for reliable fluid flow control in demanding industrial piping systems. Featuring a robust metallic body and secure flanged connections, it ensures a leak-tight seal and long-term durability. The integrated lever handle allows for quick, manual operation, making it an ideal choice for maintenance and process control applications.

Technical Specifications

Handle Color

Green

Connection Type

Flanged

Operation

Lever Handle

Suitable Applications

Industrial, Fluid Control, Piping Systems

Construction Material

Metallic
