

Flanged Ball Valve with WCB Body

This flanged ball valve features a robust WCB (Weldable Cast Carbon Steel) body material, designed for industrial applications requiring reliable flow control. The ball valve design ensures tight shutoff and minimal pressure drop.

Overview

Industrial Flanged Ball Valve

This flanged ball valve features a robust WCB (Weldable Cast Carbon Steel) body, engineered for demanding industrial flow control applications. Designed with standard flanges, it ensures secure, leak-proof connections within complex piping systems. The ball valve mechanism provides a tight shutoff capability and minimal pressure drop, making it a reliable solution for a wide range of fluid handling requirements.

Technical Specifications

Body Material	WCB (Weldable Cast Carbon Steel)
Valve Type	Flanged Ball Valve
Connection Type	Flanged

Key Features

Performance Highlights

Tight Shutoff • Minimal Pressure Drop • Leak-Proof Connection • Industrial Grade

Suitable For	Industrial Flow Control, Piping Systems, Fluid Handling
