

# Flanged Duckfoot 90-Degree Pipe Bend

This 90-degree pipe bend features a duckfoot base for stable floor mounting. It is flanged on both ends for secure connection to other flanged components.

## Product Overview

### Double Flanged Duckfoot 90 Bend

The Double Flanged Duckfoot 90 Bend is a specialized pipe fitting engineered for 90-degree directional changes in pumping systems and pipelines. Featuring a stable 'duckfoot' base for secure floor mounting, this component is designed to minimize vibration and stress on piping systems. Its double flanged design ensures straightforward installation and maintenance, making it an ideal choice for water treatment, wastewater, and industrial processing facilities.

## Technical Specifications

Bend Angle	90 degrees
Connection Type	Double Flanged
Mounting Style	Duckfoot base for floor mounting

## Materials and Construction

Material Composition	Ductile Iron, Carbon Steel
----------------------	----------------------------

## Applications

### Suitable Industries

- Water treatment plants
- Wastewater facilities
- Industrial processing plants
