

# Flanged Ductile Iron Elbow with Square Base

These flanged ductile iron elbows feature a square base for stable 90-degree pipe connections. Their design ensures straightforward installation and facilitates easy maintenance.

## Product Overview

### Durable Industrial Connection

This flanged ductile iron elbow with a square base is engineered for robust 90-degree pipe connections in industrial fluid and gas transfer systems. The integrated square base offers enhanced stability and structural support, while the flanged ends facilitate straightforward installation and future maintenance. Built from durable ductile iron, this component is designed to withstand demanding operational environments.

## Technical Specifications

Material	Ductile Iron
Connection Angle	90 degrees
Connection Type	Flanged, Square Base

## Key Features

### Suitable Applications

- Fluid transfer systems
- Gas transfer systems
- Industrial piping networks

### Installation Benefits

Easy Installation • Stable Support • Maintenance Friendly
