

# Flanged Ductile Iron Pipe Fitting

Ductile iron pipe fitting featuring flanged connections. It is suitable for use in building materials engineering and other construction materials engineering applications.

## Product Overview

### Robust Flanged Ductile Iron Fitting

This flanged ductile iron pipe fitting is engineered for high-performance applications in building materials and construction engineering. Designed to provide a reliable and secure connection, it ensures durability and structural integrity in industrial and commercial plumbing or piping systems. Its robust construction makes it an ideal solution for demanding infrastructure projects.

## Technical Details

Material	Ductile Iron
Connection	Flanged
Part Number	041901110 8008

## Applications

Primary Applications	Building Materials Engineering, Construction Engineering, Industrial Piping, Commercial Infrastructure
