

Flanged Ductile Iron Pipe Fittings

Ductile iron fittings designed for use in piping systems. The flanged design incorporates multiple bolt holes to ensure secure connections.

Product Overview

High-Performance Ductile Iron Fittings

These flanged ductile iron pipe fittings are engineered for robust performance in demanding piping systems, including water, gas, and sewage applications. Featuring a durable flanged design with precision-drilled bolt holes, they ensure secure, leak-resistant connections. Each unit is finished with a protective black coating, providing essential resistance against corrosion and environmental wear for long-term reliability.

Technical Specifications

Material	Ductile Cast Iron
Connection Type	Flanged
Surface Finish	Anti-corrosion black coating

Applications

Primary Applications	Water Supply, Gas Distribution, Sewage Systems, Industrial Piping
----------------------	---

Logistics & Handling

Packaging Condition

Palletized • Ready for Transport
