

Flanged Globe Valve for Industrial Piping

This globe valve is designed with flanged ends for secure and reliable connections in piping systems. It is suitable for regulating flow in various industrial applications.

Product Overview

Industrial Flanged Globe Valve

This industrial globe valve is engineered with flanged ends to provide a secure and reliable connection within demanding piping systems. Designed for precision flow regulation, it excels in high-pressure and high-temperature environments. Its robust construction ensures a leak-proof seal, while the flanged design facilitates straightforward installation and routine maintenance.

Technical Specifications

Connection Style

Flanged Ends

Key Features

- Secure and reliable connection
- Leak-proof seal
- Ease of installation
- Simplified maintenance

Valve Type

Globe Valve

Application Suitability

High Pressure, High Temperature, Industrial Piping
