

Flanged Immersion Heating Element

Immersion heating element with a flanged mounting plate designed for efficient heat transfer in liquids. The tubular heating element is bent to maximize surface area and ensure optimal heat distribution.

Product Overview

High-Efficiency Immersion Heating

This flanged immersion heating element is engineered for superior heat transfer in liquid-based industrial applications. Featuring a robust tubular design, it maximizes surface area to ensure rapid and consistent heating performance. The integrated flanged mounting plate provides a secure, leak-proof connection, making it an ideal solution for demanding environments where reliability is paramount.

Technical Specifications

Mounting Style	Flanged
Design	Tubular
Key Features	Leak-proof, High Efficiency, Industrial Grade
Application	Liquid Immersion
