

Flanged Plastic Pipe Fitting

This fitting is designed for connecting pipes or tubes to a flat surface. It is made of light-colored plastic or composite and ensures secure, leak-proof connections in fluid or gas handling systems.

Product Overview

Professional Grade Flanged Fitting

This flanged plastic pipe fitting is engineered for secure and reliable connections in industrial fluid or gas handling systems. Featuring a smooth finish and precise dimensions, it ensures a leak-proof seal when connecting pipes or tubes to flat surfaces or mating components. Designed for durability and ease of installation, this component is an essential element for maintaining integrity in piping infrastructure.

Physical Characteristics

Material Composition	Industrial-grade plastic/composite
Design Features	Flanged, Cylindrical Body, Smooth Finish, Leak-proof Design

Application

Applications

- Fluid handling systems
- Gas handling systems
- Industrial piping connections
- Plumbing infrastructure
