

Flanged Stainless Steel Three-Piece Ball Valve

This three-piece ball valve is constructed from stainless steel and features flanged connections. It is designed for high-pressure environments and corrosive media, providing reliable shut-off and control of fluid flow.

Product Overview

Industrial Three-Piece Ball Valve

This three-piece flanged ball valve is engineered for demanding industrial applications requiring reliable flow control and fluid shut-off. Constructed from high-grade stainless steel, the valve is specifically designed to perform in high-pressure environments and handle corrosive media effectively. Its modular three-piece body design allows for straightforward maintenance and repair, minimizing downtime while ensuring long-term operational efficiency.

Technical Specifications

Valve Type	Three-Piece Ball Valve
Material	Stainless Steel
Connection Type	Flanged
Operation	Manual Actuator

Design Features

Key Features	High Pressure, Corrosion Resistant, Easy Maintenance, Modular Design
