

Flanged Tee Pipe Fitting

This flanged tee fitting connects three pipes in piping systems. The loose flange design allows for easy installation and alignment.

Product Overview

Loose Flange Tee Overview

This flanged tee fitting is designed for efficient integration into piping systems that require a three-way connection. Featuring a loose flange design, it offers enhanced flexibility during installation and alignment, reducing labor time. The component is finished with a protective blue coating, providing essential corrosion resistance for durability in industrial environments.

Technical Details

Surface Coating

Corrosion Resistant • Blue Finish

Primary Applications

- Industrial piping systems
- Fluid transport
- System branching

Fitting Type	Loose Flange Tee
Material	Cast Iron, Steel
