

# Flanged Tee Pipe Fitting

This pipe fitting connects three pipes, and all ends are flanged for easy installation and maintenance. It is suitable for combining or dividing fluid flow in piping systems.

## Product Overview

### All Flanged Tee Pipe Fitting

The All Flanged Tee is a versatile pipe fitting designed to connect three pipes, allowing for the efficient combining or dividing of fluid flow in piping systems. Featuring flanged ends for secure and leak-proof assembly, this fitting is engineered to withstand high-pressure and high-temperature environments. It is a critical component for demanding industrial applications, including oil and gas, chemical processing, and water treatment facilities.

## Technical Standards

Flange Standards	ASME B16.5, EN 1092-1
------------------	-----------------------

## Material & Compatibility

### Material Options

- Carbon Steel
- Stainless Steel
- Alloy Steel

## Key Features

### Connection Type

Flanged

Primary Industries	Oil and Gas, Chemical Processing, Water Treatment
--------------------	---
