

Flanged Union Iron Pipe Adapter

This flange adapter connects pipes, valves, pumps, and other equipment to create a piping system. It provides a secure, leak-proof connection and allows for easy assembly and disassembly.

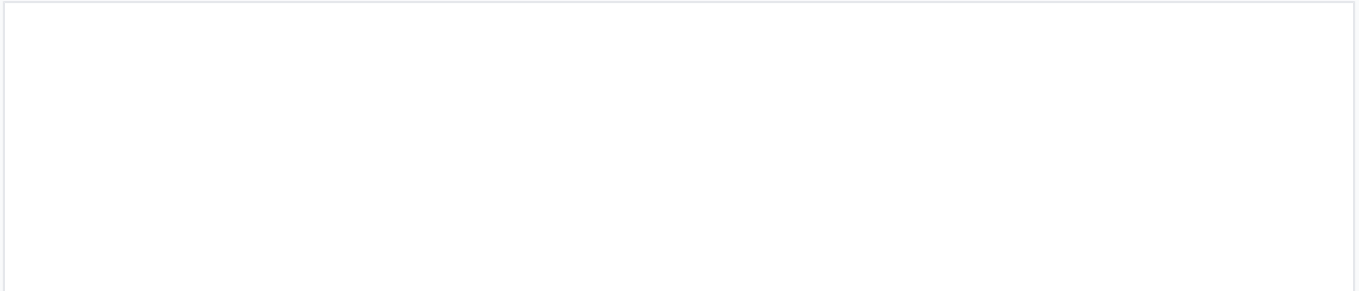

Product Overview

Industrial Flanged Union Adapter

The Flanged Union Iron Pipe Adapter is a precision-engineered component designed to create secure, leak-proof connections in industrial piping systems. Constructed via casting from durable iron, this adapter ensures reliable performance under various operational conditions. Its equal shape and flanged connection make it a versatile choice for integrating valves, pumps, and pipes into complex systems.

Technical Specifications

Precision-engineered adapter designed for secure, leak-proof connections in industrial machinery.

Material	Iron
Technics	Casting
Connection	Flange
Shape	Equal
Type	Union
Head Code	Other
Place of Origin	Shandong, China

Logistics & Trade

Supply Ability

800 Ton

Monthly Supply

Minimum Order Quantity	10 Piece
Delivery Time	20 days
Payment Terms	L/C, T/T
Packaging	Wood pallet
Port	Qingdao
