

Flanged Water Meter for Flow Measurement

This water meter accurately measures water flow in various applications. It features a clear register and robust construction with flanged connections for secure installation.

Product Overview

High-Precision Flow Measurement

The LXLC(R) series water meter is a high-quality instrument engineered for the precise measurement of water flow across industrial, commercial, and residential applications. Featuring a robust construction with secure flanged connections, this meter is designed for reliability and durability in demanding environments. Its clear, easy-to-read register ensures accurate tracking of total water consumption for effective resource management.

Technical Specifications

Size Range	50mm to 300mm
Connection Type	Flanged
Suitable Applications	Industrial, Commercial, Residential
Primary Function	Water flow measurement and total consumption tracking
