

# Flare Fitting Injection Mold

This precision mold is engineered for manufacturing flare type fittings, ensuring accurate dimensions and smooth surfaces. Its multi-cavity design enhances production efficiency, while advanced cooling channels maintain optimal temperature control.

## Product Overview

### Precision Flare Fitting Injection Mold

This precision-engineered injection mold is specifically designed for the high-volume manufacturing of flare-type fittings. Featuring a multi-cavity design, it optimizes production efficiency while ensuring accurate dimensions and superior surface finishes. The mold is constructed from durable, high-grade materials and incorporates advanced cooling channels to maintain consistent temperature control and part quality across various plastic materials.

## Commercial Terms

Minimum Order Quantity	1 Pound
Unit Price Range	2000 - 20000 USD
Payment Types	T/T, L/C

## Logistics & Supply

### Production Capacity

**30 molds/month**

Monthly Output

**300 molds/year**

Annual Supply

### Transportation Options

- Ocean
- Land
- Air

Lead Time	40 Days
Packaging	Wooden case
