

# Flat Cable Clip with Hardened Steel Nail

This flat cable clip is designed to secure flat cables to surfaces. It features a durable plastic body and a hardened steel nail for easy installation.

## Product Overview

### Professional Cable Management Solution

This flat cable clip is engineered to provide a secure and organized routing solution for flat cables. Featuring a durable plastic body paired with a hardened steel nail, it ensures reliable installation across various surface types. It is an essential component for efficient cable management in professional electrical and networking installations.

## Technical Specifications

Material Composition	Durable Plastic, Hardened Steel
Compatible Cable Type	Flat Cable
Installation	Nail-in

## Key Features

### Primary Applications

- Cable organization
- Surface mounting
- Network cable management
- Electrical installation
