

Flat Panel Aluminum Radiator

This flat-panel aluminum radiator is designed for efficient heat dissipation and energy savings. Its lightweight, durable aluminum alloy construction ensures rapid heating and corrosion resistance.

Product Overview

High-Efficiency Heating Solution

This flat-panel aluminium radiator is engineered for optimal heat dissipation, providing rapid and reliable warmth for both residential and commercial environments. Constructed from high-quality, lightweight aluminium alloy, the unit offers superior thermal conductivity while maintaining excellent resistance to corrosion. Its sleek, modern design is built for space-saving efficiency and ease of maintenance, making it an ideal choice for professional heating installations.

Technical Specifications

Material	Aluminium alloy
Key Features	Flat-panel, Corrosion-resistant, Lightweight, Rapid heating

Installation & Compatibility

Installation

- Compatible with standard plumbing connections
- Suitable for residential systems
- Suitable for commercial systems

Maintenance	Easy-to-clean surface
