

Flat Plate Solar Collector for Water Heating

This high-efficiency flat-plate collector is designed for solar water heating systems. It features durable construction with a selectively coated absorber plate for optimal solar energy absorption and minimal heat loss.

Product Overview

High-Efficiency Solar Heating

This high-efficiency flat-plate collector is designed specifically for solar water heating systems in both residential and commercial applications. Engineered for durability, it features a selectively coated absorber plate that maximizes solar energy absorption while minimizing heat loss. The unit is built to withstand harsh weather conditions, ensuring long-term performance and reliable hot water production.

Five Star Rated

Technical Specifications

Key Features

- Selectively coated absorber plate
- Minimal heat loss design
- Weather-resistant construction
- Optimized for solar energy absorption
