

Flat-Screen CRT Television with Stereo Speakers

This flat-screen CRT television has a 4:3 aspect ratio display. It features integrated stereo speakers and multiple input options including composite, S-Video, and coaxial.

Overview

Classic Visual Performance

The FT2101 is a reliable flat-screen CRT television designed for environments requiring a traditional 4:3 aspect ratio display. Featuring integrated stereo speakers, this unit delivers clear audio alongside its visual output. It is a straightforward, functional solution for standard broadcast and legacy media playback needs.
