

Flat Steel Plant Channel Gate

This is a flat steel plant channel gate. It is designed for controlling flow in industrial plants.

Product Overview

Industrial Channel Gate Solution

This flat steel plant channel gate is engineered for robust industrial flow control and water management applications. Designed for reliability in demanding plant environments, the unit ensures consistent performance for critical infrastructure. Its durable construction supports efficient operation and long-term serviceability for plant facilities.

Certifications

Compliance Scope

- Design, development, and production of industrial valves
- Butterfly valves up to DN5000mm
- Gate valves up to DN2000mm
- Rocker drilling machines up to 63mm

Quality Certifications	ISO 9001:2000
