

Flat Webbing Sling for Heavy Lifting

This flat webbing sling is designed for lifting heavy loads. It is made from durable synthetic fibers, providing strength and flexibility with reinforced lifting eyes for secure attachment.

Product Overview

High-Performance Flat Webbing Sling

Designed for heavy-duty lifting, this flat webbing sling combines high strength with a lightweight, flexible construction. Its smooth surface ensures minimal damage to delicate loads, while the color-coded system allows for easy identification of working load limits according to international standards. Ideal for use in narrow spaces, this non-conductive sling provides a safe and reliable solution for construction, manufacturing, and logistics applications.

Technical Features

Material Characteristics

- High strength-to-weight ratio
- Non-electric conductive
- Smooth surface for load protection
- Lightweight and soft for narrow spaces

Certifications

CE, International Standard Compliant

Operational Details

Operational Advantages

- Suitable for loading round objects
- Supports various loading methods (including dragging/pulling)
- Even load distribution for longer service life
- Optional anti-abrasion and anti-incision protection sleeves

Identification System

Color-coded working load limits per international standards for easy identification even after abrasion.
