

Flat Webbing Sling

This high-strength flat webbing sling is designed for lifting and rigging applications. It is constructed from durable synthetic fibers and features reinforced loops at both ends for secure attachment to lifting equipment.

Product Overview

High-Strength Lifting Solution

This flat webbing sling is engineered for demanding lifting and rigging applications across construction, manufacturing, and transportation sectors. Constructed from durable, high-strength synthetic fibers, the sling provides superior resistance to abrasion, stretching, and UV degradation. It features reinforced loops at both ends to ensure secure attachment to lifting equipment and reliable, safe operations.

Technical Specifications

Material Characteristics

- High-strength synthetic fiber construction
- Abrasion resistant
- Low stretch properties
- UV degradation resistant

Safety Standards

Industry Compliant, Safety Rated

Design Features

Recommended Industries

Construction • Manufacturing • Transportation

End Attachment

Reinforced loops at both ends
