

# Flatbed Printing Machine for Rigid and Flexible Materials

This flatbed printing machine is designed for printing on various materials. It is suitable for printing on rigid and flexible materials, including acrylic, wood, metal, glass, and textiles.

## Overview

### Industrial Flatbed Printing Solution

This high-performance flatbed printing machine is engineered for versatility, capable of handling both rigid and flexible substrates with precision. Featuring a robust frame and advanced closed-ink system, it ensures reliable, high-quality output for demanding industrial applications. Its precise positioning system makes it an ideal choice for printing on diverse materials such as acrylic, wood, metal, glass, and textiles.

## Technical Specifications

### Key System Features

- Closed ink system
- Precise positioning system
- Movable printing head
- Robust industrial frame

### Primary Use Case

Industrial Printing

### Compatible Materials

Acrylic, Wood, Metal, Glass, Textiles
