

Flatbed Semi-Trailer with Side Rails

This semi-trailer is engineered for heavy-duty transport and logistical operations. It features a flatbed design with sturdy side rails for securing cargo.

Overview

Robust Flatbed Transport Solution

This high-strength steel flatbed semi-trailer is engineered for heavy-duty logistical operations and versatile cargo transport. Featuring a flatbed design with integrated side rails, it offers a secure and stable platform for a variety of loading requirements. The multi-axle configuration is optimized for load distribution, ensuring reliability and stability across diverse transportation environments.

Technical Specifications

Finish and Protection

Yellow Paint Finish • Corrosion Protected
