

# Flexible Abrasive Disc for Grinding and Finishing

Abrasive flexible discs are designed for grinding, blending, and finishing on a variety of materials. The flexible construction minimizes gouging and maximizes surface contact, resulting in a smooth, uniform finish.

## ADDITIONAL IMAGES

## Product Overview

### Versatile Flexible Abrasive Disc

These abrasive flexible discs are engineered for high-performance grinding, blending, and finishing tasks across a wide range of materials. Featuring abrasive grains bonded to a flexible backing, they conform seamlessly to workpieces to ensure consistent material removal while minimizing the risk of gouging. This design maximizes surface contact, making them an ideal choice for achieving smooth, uniform finishes on metal, wood, plastic, and composite surfaces.

## Technical Specifications

### Primary Applications

- Grinding
- Blending
- Finishing

### Tool Compatibility

Angle Grinders

### Compatible Materials

Metal, Wood, Plastic, Composites

## Key Features

### Performance Highlights

**1 High**

Surface Adaptability

**1 High**

Finish Consistency
