

# Flexible Aluminum Duct for Range Hoods

This flexible aluminum duct is designed for range hoods. Its corrugated structure provides strength and prevents kinking, ensuring optimal ventilation.

## ADDITIONAL IMAGES

## Product Overview

### Professional Ventilation Solution

This semi-rigid aluminum flexible duct is engineered specifically for top-sucking range hoods, offering a durable and corrosion-resistant ventilation solution. Its unique machine-fabricated lock seam allows for extensive bending and compression without leakage, delamination, or dry rot. Designed for efficient installation, the duct maintains an unrestricted diameter even with severe bends, making it ideal for both residential and commercial kitchen environments.

## Technical Specifications

### Available Lengths

- 5 foot
- 10 foot
- 15 foot

<b>Material</b>	Special aluminum alloy
-----------------	------------------------

<b>Compression Ratio</b>	3 x
--------------------------	-----

## Key Features

### Installation Benefits

Easy Installation • Tight Space Compatible • Unlimited Lengths • Severe Bend Capable

<b>Performance Features</b>	Corrosion Resistant, Heat Aged Resistant, Leak Proof, Flexible
