

Flexible Corrugated Hose

Flexible corrugated hoses are made from durable materials. The hoses are designed for diverse applications requiring flexibility and protection and are coiled for compact storage and easy deployment.

Product Overview

Flexible Corrugated Hose Solution

These flexible corrugated hoses are engineered for diverse applications requiring both flexibility and robust protection. Designed to serve as a reliable conduit for fluids, cables, or ventilation systems, they are suitable for automotive, industrial, and household environments. The coiled design ensures compact storage and easy deployment on the job site.

Physical Properties

Design Features

- Corrugated structure for flexibility
- Coiled for compact storage
- Easy deployment

Available Colors

Yellow, Silver, Blue, Black, Red

Applications

Primary Applications

Automotive • Industrial • Household

Suitable For

- Fluid transport
- Cable protection
- Ventilation systems
