

Flexible Corrugated Hose

This flexible and expandable hose is designed for various industrial applications. Constructed from durable, corrugated material, it offers enhanced flexibility and resistance to abrasion.

Product Overview

Industrial Flexible Corrugated Hose

This flexible and expandable corrugated hose is engineered for high-performance industrial applications, including ventilation systems, material handling, and vacuum operations. Its durable design offers exceptional resistance to abrasion and crushing while maintaining a tight bend radius for easy installation. Versatile and adaptable, it provides reliable performance when conveying air, dust, fumes, and light materials.

Technical Specifications

Primary Applications

- Ventilation systems
- Material handling
- Vacuum applications
- Air and fume extraction

Build Quality

Industrial Grade • Corrugated Construction

Key Features

Flexible, Expandable, Abrasion Resistant, Crush Resistant
