Product Overview

High-Efficiency Flexible Venting Solution

This flexible PVC air duct is engineered for optimal performance in low to medium pressure exhaust systems. Its fire-proof construction and helix steel wire reinforcement provide a balance of safety and structural integrity. Designed for high flexibility and axial compressibility, it is an ideal solution for clothes dryers and air conditioning systems where space and ease of installation are priorities.

Technical Performance

Operating Temperature

-15

Min Temp

80

Max Temp

Material & Construction

Materials

- Fire-proof PVC film
- Helix steel wire reinforcement
- Spiral-reinforced structure

Safety & Compliance

Fire Proof, Heat Resistant, Kink Resistant

Physical Properties

Available Shapes

Round • Rectangular

Flexibility

High flexibility with axial compressibility for tight spaces

Applications

Recommended Applications

- Clothes Dryer Machines
- Air Conditioning Systems
- Low/Medium Pressure Exhaust Systems

Compatibility

Compatible with most standard dryer and HVAC connections
