

Flexible Grinding Disc for Stainless Steel

This flexible grinding disc is designed for polishing stainless steel. It has a diameter of 100mm and dimensions of 100x2.5x16mm.

Product Overview

Flexible Grinding Disc for Stainless Steel

These flexible grinding wheels feature a depressed center flange, specifically engineered for use with handheld angle grinders. Optimized for stainless steel applications, they offer superior performance and durability when utilized at a 15-30 degree angle to flat surfaces. Designed for precision and longevity, these discs are an essential tool for professional metalworking and finishing tasks.

Technical Specifications

Diameter	100 mm
Thickness	2.5-2.7mm
Arbor Hole Size	16 mm
Maximum Operating Speed (m/s)	80 m/s
Maximum Operating Speed (RPM)	15300 rpm

Usage Guidelines

Recommended Grinding Angle	15-30 degrees
Suitable Materials	Stainless Steel, Steel

Features

Key Features

- Depressed center flange design
- Flexible construction for soft touch applications
- Single mesh reinforcement
- Optimized for long service life
