Product Overview

Versatile HVAC Ventilation Solutions

This flexible ducting range offers versatile solutions for residential, commercial, and industrial ventilation systems. The collection includes insulated and non-insulated flexible ducts, as well as semi-rigid aluminum options, all engineered for durability and corrosion resistance. Designed with a corrugated aluminum core, these ducts provide excellent flexibility for easy installation in tight spaces while maintaining high performance standards.

Technical Specifications

Diameter Range

4 in

Minimum Diameter

20 in

Maximum Diameter

Insulation Material Options

- Fiberglass
- Mineral Wool

Insulation Color Options

White • Brown • Pink • Yellow

Available Configurations

Insulated Flexible Duct, Non-insulated Flexible Duct, Semi-rigid Aluminum Duct

Compliance & Standards

Safety and Quality Standards

The entire ducting range is manufactured to comply with industry standards for fire safety and indoor air quality. The construction ensures thermal resistance and sound dampening properties, making it suitable for a wide variety of air handling applications.
