Product Overview

High-Performance Flexible LED Lighting

This flexible LED strip light utilizes high-efficiency 2835 SMD technology to deliver superior brightness with minimal heat generation. Designed for versatility, its waterproof construction allows for bending and shaping to fit various architectural and decorative lighting needs. With low light attenuation and a long service life, this solution is ideal for professional indoor and outdoor lighting applications.

Technical Specifications

LED Type	2835 SMD
Operating Voltage	12 V
Key Features	High Brightness, Low Heat Generation, Low Light Attenuation, Long Service Life

Installation & Design

Waterproof Technology

Waterproof

Installation Notes

- Can be bent at will
- Cuttable at marked intervals

Flexibility	Yes
