

Flexible LED Strip Light

This flexible LED strip light features multiple individual LED emitters evenly spaced along its length. Encased in a clear, translucent material, it provides both protection and flexibility for various lighting applications.

Product Overview

Professional Flexible LED Lighting Solution

This flexible LED strip light is engineered for versatility and high-performance illumination in demanding professional environments. Encased in a durable, protective polymer material, the strip maintains flexibility while providing a consistent, bright light output. It is an ideal solution for accent lighting, equipment rack illumination, and signaling applications where reliable visibility is a priority.

Technical Specifications

Design	Flexible LED Strip
Protection	Encased in clear protective polymer
Light Emission	Cool White, Blue

Applications

Primary Applications

- Accent lighting
- Signage
- Decorative purposes
- Telecommunication equipment racks
- Control panels
