

Flexible Packaging Printing Machine

This high-precision printing machine is designed for flexible packaging and label applications. It features multi-color printing, automatic tension control, and a precise registration system.

Product Overview

Professional Flexible Packaging Solution

This high-precision soft printing machine is engineered specifically for the demands of flexible packaging and label production. It features robust automatic tension control and a sophisticated registration system to ensure consistent, high-quality output across multi-color designs. Suitable for diverse substrates, it provides versatile production capabilities for manufacturers seeking efficiency and precise graphic reproduction.

Technical Capabilities

Substrate Compatibility

- Plastic films
- Paper
- Aluminum foil

Adjustable Parameters

Adjustable Printing Speed • Variable Web Width

Features

Multi-color Printing, Automatic Tension Control, Precise Registration, Advanced Drying System
